Node JS - Calculator

The following exercise contains the following subjects:

 ◆ Yargs

Instructions

Write a calculator app that uses yargs.

Create the following operations: (add, substract, multiply, pow).

These following arguments in your terminal should work:

* node calc --add 1 2 // returns 3

* node calc --sub 9 2 // returns 7

* node calc --mult 2 4 // returns 8

* node calc --pow 4 2 // returns 16
